8V10. I bought Alchemy of Castle despite it's limited grasp of English because the concept sounded interesting enough to try anyway. You play as a witch who wants to release the devil from hell. To do so, you need to craft 30 panacea.

I thought that sounded really cool. To be honest, I'd really like to play some games where the core gameplay involves alchemy. I'm still looking for some good examples, so if you ever find a game like that, hit me up.

Sadly, this didn't turn out to be what I was hoping for. I imagined there'd be lots of gathering herbs and combining elements and mixing potions. Basically you just click on a big pot in the middle of the room and it generates crystals which you use to make health, mana, or soul potions to refill your constantly lowering health, mana, and soul bars. Every now and then the pot coughs up a panacea. And that's it, that's the whole game. Just clicking on a pot. And you don't even get to see nice animations of the crystals coming out of the pot. It just comes up with text saying +1 white crystal.

It's hard to be mad when this game only cost me 70 cents, I just wish it could have been so much more. So yeah, there's nothing really to recommend this game, it's empty. Okay the two single pieces of artwork in the game are nice, that's the one positive. 1/5 stars.

. I played this game before it was released on Steam.

As like the other Fervent game, Cupid, this one is really good for a short, free visual novel.

The story gets complex and like Cupid, depending on your choices, your ending and role in the game changes. You could be the real Mike as well as the fake. The choices are small and subtle but impact your story greatly. The art is great. The writing is good and overall for a free visual novel, it's really good.. Short words: I owe many games and that was the only one, that I want to return.. i really really really like this game, great music gameplay and art! please make more, i would love to buy dlc or another game like this. i would even pay 60\$ for a full length game like this.

also the art in this is better then deep space waifu, imo some of the art in deep space waifu is kind of derpy, but in this game is all top tier. i actually like the bullet hell system in this more. dont get me wrong i like deep space waifu, but i think the game comes off a bit more profesonal looking.. Would of been a Nice Game If They Added France But now... They Have Abandoned It

It's pretty bad, and that's disappointing considering this is one of very few games on this subject matter. You basically just steer your ships around the map, watching the AI gunners do their thing. Got boring extremely quickly.

Better off avoiding this one.. Fun game to pass some time. Don't expect any depth however, but then it's only 0.99 cents. I have already gotten my moneys worth out of it.. this game is super boring ur just doing the same thing over and over.. Achievements are broken, and honestly that's the only reason I was going to play this game. Go play 12 Labours of Hercules instead.. Game stops running properly on mission 15 after the ground breaks away, cant place any defensive turrets. Would be a great game if this was fixed!!. Speedrunners and fans of rock hard platformers might get some amount of enjoyment out of this, but only if they have played every other game of this genre on steam. It's just a bland super meatboy clone.

And the music ... just doesn't fit.. This game was a surprising bit of fun, as long as you get in to it knowing it will be buggy and very **very campy you'll have a good fun time. Though there are twists in the story you can see them coming from a mile away, don't purchase this game for the story because you won't get much. However, if you're looking for some fun gameplay there is a good bit for you here; though the afformentioned bugs can be detrimental to that.**

PS the buggy section is the worst thing in the world. The program will Terminated??. good for have trading card. Crap. Dev has to try push this sh!t three times on greenlight. And even on trailer you can see how bad it is.

It's just bad - only 3 pics (and of course "more to come"). Not many options. Misleading arrows (they don't show more options, but change picture). Limited colors. Hard to aim... blurry zoom.

And it's all paid. You can find better "children drawing" things on internet for free...
